DIVYRAJ SOLANKI

Toronto, ON | +1 (437) 256-2343 | LinkedIn | GitHub | Portfolio: https://divyrajsolanki.vercel.app/

SUMMARY

Junior Full-Stack Developer with a Computer Programming diploma from Seneca College. Skilled in JavaScript, React, Next.js, Node.js, and database integration. Experienced in building responsive web and mobile applications, with additional IT troubleshooting and cybersecurity knowledge. Strong foundation in problem-solving, customer service, and system accuracy from technical and retail experience.

EDUCATION

Seneca College, Toronto, ON — August 2024

- *Diploma in Computer Programming*
- *Relevant Coursework:* Data Structures & Algorithms, Web Development, Mobile App Development, Database Systems, Networking Fundamentals

TECHNICAL SKILLS

- *Computer Languages:* JavaScript (ES6+), Java, C++, HTML, CSS, Kotlin, Python, C, PHP, SQL, XML
- *Frameworks & Tools:* React.js, Next.js, Node.js, Git/GitHub
- *IT & Cybersecurity:* Networking fundamentals, troubleshooting, penetration testing tools (Kali Linux, Nmap, Burp Suite, TryHackMe)

WORK EXPERIENCE

SMSito, *Junior Web Developer*, Toronto, ON — Nov 2024 - Present

- Contributed to building an iOS Messages UI clone by coding **15+ reusable front-end components** with consistent styling and responsive layouts
- Assisted in integrating **2 third-party APIs** for real-time SMS synchronization, supporting user testing with **100+ trial messages**
- Helped implement Supabase PostgreSQL for authentication and storage, ensuring **secure access for all users during beta testing**.

Staples Canada, *Tech Sales Associate*, Toronto, ON — Jan 2023 – May 2023

- Delivered personalized tech solutions to 50+ customers per week, improving customer satisfaction and repeat sales.
- Achieved 15% increase in sales by upselling extended warranties, software packages, and peripherals.
- Provided troubleshooting and setup support for 100+ devices (laptops, printers, and networking equipment), reducing return rate

PROJECTS & LEADERSHIP EXPERIENCE

Drunkard's Dilemma (Drink Recommendation Web App), *Independent Project* — 2025

- Built with **React.js (Next.js), Node.js/Express, and Supabase/PostgreSQL** for full-stack functionality.
- Implemented a **dynamic questionnaire engine** with **20+ branching logic flows** and **50+ outcomes**.
- Styled with **Tailwind CSS**, optimized for **cross-browser/device compatibility**
- Integrated **RESTful APIs**, caching, and **state management** (React Hooks/Context).
- Deployed via **Vercel CI/CD pipeline**, achieving **95+ Lighthouse performance scores**.
- Implemented **error boundaries, input validation, and fallback UIs** to ensure fault-tolerant user experience.
- Publicly accessible at: *https://drunkards-dilemma.vercel.app/*.
